

Citywide Parks Master Plan

These are drafts of the Master Plans for individual parks in Newark. These plans represent a “wish list” for each of the parks and are not limited by currently available funding. As a part of this master planning process, a priority list will be created that would be used by the City Council to guide future park improvement investments and to guide and support grant applications.

Based on community, staff, and consultant input, the preliminary priorities are:

- Skate/Bike Skills Park including a pump track at Sportsfield Park
- Dog Parks at Birch Grove, Newark Community, and the future Bayshores Park (TOD)
- All-weather turf fields at Sportsfield Park.
- Shirley Sisk Grove Amphitheater Enhancement

These draft Master Plans and priorities will be discussed at a Community Meeting on **November 9th at the Community Center at 6:00pm.**

It should be noted that the Area 4 land that has been designated in the City’s General Plan for open space-recreation is not discussed here. This land should be considered for “destination” recreation that would be financed with recreation user fee revenue and development fees . These potential uses will be investigated at a later point for financial feasibility. Staff and our consultants did not think that our limited financial resources should be directed at this destination recreation at this time.
