1.0 INTRODUCTION

1.1 Purpose and Scope of Work

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the vacant Rogers property located near the end of Stevenson Boulevard in Newark, California (the subject property or site) (Plate 1). The site consists of two parcels totaling approximately 115.1 acres. PES Environmental, Inc. (PES) was retained by Sobrato Development Companies (Sobrato) to compile and evaluate available information on existing environmental issues at the site, and to evaluate the potential for onsite and/or offsite releases of hazardous materials that may affect the subject property. PES understands that Sobrato is evaluating acquisition and redevelopment of the property.

The ESA was performed in general accordance with American Society for Testing and Materials (ASTM) guidelines for Phase I Environmental Site Assessments (ASTM E 1527-05). The following tasks were conducted during this ESA:

- Reviewed Federal, State and local agency databases to identify nearby sites which have reported the use, storage, or release of hazardous materials;
- Reviewed regulatory agency records regarding the site and adjacent properties;
- Reviewed historical aerial photographs and historical topographic maps of the site and surrounding area to evaluate prior land uses;
- Conducted historical research and reviewed historical information for the site;
- Reviewed an environmental database search as required by All Appropriate Inquiry (AAI) guidelines;
- Interviewed individuals with knowledge of the site;
- Conducted an inspection of the site and a reconnaissance of surrounding properties to assess the potential for contamination of the site from onsite or offsite sources. The site visit was conducted by an environmental professional with qualifying experience; and
- Prepared this report presenting the results of the Phase I ESA investigation.

1.2 Special Terms and Conditions

Chain-of-title documentation was not provided. The ESA activities were conducted in general accordance with ASTM E1527-05.
1.3 Limitations and Exceptions

This Phase I ESA was performed in accordance with practices and procedures generally accepted in the consulting engineering field at the time they were performed. Our professional judgment to assess the potential for contamination is based on limited data; no warranty is given or implied.

The Phase I ESA was prepared at the request of Sobrato as part of the due diligence for acquisition of the property and may be relied on only by Sobrato and the Sobrato affiliate formed to acquire the property, if any. No other party may rely on this report without the express written permission of Sobrato and PES.

Additionally, PES was not provided information regarding the purchase price of the subject property nor prices of comparable properties in the site vicinity. An evaluation of the purchase price to those of comparable properties should be conducted by the user of this Phase I ESA in accordance with AAI.

2.0 SITE DESCRIPTION

2.1 Location

The subject property is comprised of two parcels totaling approximately 115.1 acres identified by Alameda County Assessor’s Parcel Numbers (APNs) 537-0850-007-02 and -011-04. The subject property has no address.

The site is located in a mixed undeveloped/agricultural and commercial area within the City of Newark and County of Alameda, California (Plate 1). The site is bounded to the northwest by an Alameda County Flood Control District (ACFCD) drainage channel and undeveloped land, to the northeast by railroad tracks, to the southeast by undeveloped land and to the southwest by Mowry Slough and undeveloped land (Plate 2).

2.2 Site and Vicinity Characteristics

The site is undeveloped land (Plate 2). Access to the property is via a gated entrance on Mowry Avenue and across the adjacent Heath property to the northwest. There is no direct access to the subject property. The subject property is situated in an area that is mixed undeveloped and commercial.

According to the United States Geological Survey (USGS) Newark, California Quadrangle 7.5-minute series topographic map dated 1993, the site is situated at an elevation of approximately 10 feet above mean sea level. The site is relatively flat and slopes regionally to the south. The closest water bodies are Mowry Slough, which is present at the west property boundary, and the ACFCD drainage channel at the northwest property boundary.
2.3 Regional Geology and Hydrogeology

Based on the results of investigations performed in the site vicinity, soils in the area consist primarily of silts and clays. Groundwater has been encountered in the site vicinity at depths ranging from approximately 2 to 7 feet below ground surface (bgs). Based on topography and the results of investigations performed in the subject property vicinity, groundwater flow ranging from the south to southwest is anticipated, although local variations are likely based on proximity to surface water features.

2.4 Descriptions of Existing On-Site Structures and Improvements

2.4.1 Structures and Current Use

The subject property is currently vacant. There are no structures present on the subject property.

2.4.2 Other Improvements

No services are currently supplied to the subject property, but electricity and natural gas are supplied to the subject property area by Pacific Gas and Electric (PG&E). Water and sewage services are provided by the Alameda County Water District (ACWD).

2.5 Current Uses of Adjoining Properties

PES conducted a reconnaissance of the surrounding area to assess whether neighboring sites represent a potential environmental condition that could affect the subject site. The current uses of the adjoining properties as observed during PES’ reconnaissance are summarized below.

Properties to the Northwest

The site is bound to the northwest by an ACFCD drainage channel and undeveloped land. Farther northwest is undeveloped land.

Properties to the Northeast

The site is bound to the northeast by railroad tracks. Farther northeast are vacant commercial buildings and undeveloped land.

Properties to the Southeast

The site is bordered to the southeast by undeveloped land.
Properties to the Southwest

The subject property is bordered to the southwest by Mowry Slough and undeveloped land. Further southwest, across Mowry Slough, is undeveloped land owned by ACFCD reportedly used for soil drying activities.

2.6 Past Uses of Property and Adjoining Properties

Historical site use information was obtained through a review of aerial photographs, a historical topographic map, Newark Building Department (NBD) records and results of previous investigations. Sanborn Fire Insurance Maps were not available for the subject property area.

2.6.1 Aerial Photograph Review

Aerial photographs were obtained from Environmental Data Resources Inc. (EDR) of Milford, Connecticut. Photographs for the following years were reviewed: 1939, 1946, 1959, 1965, 1982, 1993 and 1999. These photographs are presented in Appendix A. A photograph dated November 1, 2005 was reviewed at Globexplorer.com. The following is a summary of the aerial photograph review.

Subject Property

All photographs show the subject property as vacant land. The property appears to be in agricultural use in all photographs, except for the southwest portion of the site which appears to be primarily wetlands. No evidence of structures was observed on any of the photographs. Evidence of farming activities, including the presence of hay bales, mowing activities and/or farm equipment, are seen on all photographs.

Subject Property Vicinity

Photographs from 1939 through 1965 show the subject property vicinity as primarily undeveloped agricultural land with some sparsely situated farm buildings. The surrounding undeveloped land appears in various levels of cultivation throughout the years. The 1999 photograph shows commercial buildings under construction northeast of the site across the railroad tracks. The 2005 photograph shows these buildings present as currently existing.

2.6.2 Topographic Maps

PES reviewed the USGS Newark, California Quadrangle 7.5-minute series topographic maps produced in 1959; 1959 photo-revised 1968, 1973 and 1980; and 1993, and the adjoining Niles, California Quadrangle 7.5-minute series topographic maps produced in 1953; 1961; and 1961 photo-revised in 1968, 1973 and 1980. All maps show the subject property as vacant. A wetlands area is shown on the southwest portion of the site. This area corresponds to the
existing area of standing water on the site. Power lines are shown traversing the central portion of the site.

The subject property vicinity is shown as primarily undeveloped on all maps, with some sparsely situated small buildings. Railroad tracks are present along the northeast property boundary.

### 2.6.3 Newark Building Department Records

NBD did not have any files for the subject property. NBD maintains records by address only. The subject property does not currently have an address, and no records were found for the subject property in the potential address range for the site.

### 2.6.4 Interviews

PES interviewed Mr. Mark Rogers, property owner, regarding current and historical use of the site. Mr. Rogers indicated that his family has owned the property since the 1920s. Mr. Rogers reported that the property has been only used for farming and has never been occupied. The wetlands portion of the site was historically leased to a duck club for hunting. Mr. Rogers indicated that the property is currently unused, but was most recently leased to Mr. Tim Cook, who dry-farmed the property. Mr. Rogers indicated that there was a well on the property, but that it was capped or destroyed in accordance with applicable regulations approximately five years ago, although Mr. Rogers did not have any readily available documentation concerning these activities. Mr. Rogers was uncertain of the former location of the well.

PES also interviewed Mr. Tim Cook, who most recently dry-farmed the property. Mr. Cook indicated that he had dry-framed the property the past six to seven years. He grew hay and did not use any pesticides or herbicides. Mr. Cook reported that the property was leased to another farmer the previous 10 to 15 years who used the property to grow vegetables and other crops a portion of that time. Mr. Cook also reported that his father farmed the property from approximately the 1940s to the 1980s. He believed his father farmed hay and occasionally alfalfa.

### 3.0 RECORDS REVIEW

#### 3.1 Environmental Liens

Based on review of an environmental database search conducted by EDR, there are no Federal Superfund (National Priority List [NPL]) liens or State deed restrictions associated with the subject property.
3.2 Standard Environmental Record Sources

The discussion presented in this section is based on available information provided by government agencies and various databases. An EDR report dated July 20, 2006 contains listings of sites located within a 1-mile radius, which were selected in accordance with ASTM E-1527-05 standards. This information is obtained from computerized databases of Federal, State and local records. Descriptions of the lists reviewed are presented below. The EDR database report is included as Appendix C.

The following regulatory agency databases were searched and reported in the EDR report:

- U.S. EPA – Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS) – within ½ mile of the subject property;
- U.S. EPA – CERCLA NPL – within 1 mile of the subject property;
- U.S. EPA – Resource Conservation and Recovery Information System (RCRIS), Treatment, Storage, or Disposal (TSD) facilities (within ½ mile of the subject property) and Small Quantity and Large Quantity Generators of hazardous waste (SQG and LQG) databases within ½ mile of the subject property;
- U.S. EPA – Emergency Response Notification System (ERNS) – within ¼ mile of the subject property;
- U.S. EPA RCRA Corrective Action Report (CORRACTS) – within 1 mile of the Site;
- U.S. EPA Facility Index System (FINDS) – within ¼ mile of the subject property;
- U.S. EPA Toxic Chemical Release Inventory System (TRIS) – within ¼ mile of the subject property;
- U.S. Engineering Control Sites - within ½ mile of the subject property;
- U.S. Institutional Control Sites – within ½ mile of the subject property;
- California State Water Resources Control Board (SWRCB) – Leaking Underground Storage Tank Listing (LUST) sites including Indian Land – within ½ mile of the subject property;
- SWRCB – UST – within ½ mile of the Site;
- DTSC – Voluntary Cleanup Program (VCP) – within ½ mile of the site;
- SWRCB – Voluntary Cleanup Sites (VCP) – within ½ mile of the site; and
- SWRCB – Solid Waste Facilities (SWF/LF) – within ½ mile of the subject property.
In addition, local, State and Federal supplemental regulatory databases were searched (e.g., AST, Coal Gasification Plants, and Waste Discharge System databases) and summarized in the EDR report. The findings of the review of the EDR report are presented below.

3.2.1 Subject Property Records

The subject property was not listed on any of the regulatory agency databases searched. No records were found for the subject property at Alameda County Department of Environmental Health, Alameda County Water District or Newark Fire Department.

3.2.2 Surrounding Area

Several sites in the subject property vicinity are listed on hazardous materials release and/or storage databases. The site closest to the subject property or most likely to have the potential to pose an environmental concern to the subject property is discussed below.

**Cerro Metal Products**, 6707 Mowry Avenue is located approximately ¼ mile northwest of the subject property across Mowry Avenue. The site is listed on the CERCLIS – No Further Remedial Action Planned, SLIC, RCRA-SQG, HAZNET and Historical UST databases. According to regulatory agency records, Cerro Metal Products (Cerro) operated at the site from the late 1950s until 1986. Various chemicals, including solvents and petroleum hydrocarbons, were used in operations at the site, which included unlined sludge settling ponds, an oil/water separator, neutralization/acid storage tanks, a wastewater drainage ditch, evaporation ponds, and a diesel UST.

Soil and groundwater investigations began in 1986. Elevated concentrations of volatile organic compounds (VOCs), petroleum hydrocarbons and lead were detected in soil (URS, 1992), which was excavated and disposed offsite in 1994 (URS, 1996). Groundwater investigations included installation and sampling of 15 groundwater monitoring wells and six extraction wells. The results of analysis indicated the presence of total petroleum hydrocarbon as diesel (TPHd) and solvents, primarily trichloroethene (TCE) and 1,1,1-trichloroethane (1,1,1-TCA), in groundwater. The measured groundwater flow direction ranged from the south to the southwest.

The extent of the contaminant plume was delineated and found not to extend beyond the facility boundary. No contamination has been detected in monitoring wells located at the southern (downgradient) facility boundary, closest to the subject property (URS, 2000a,b). Groundwater remedial activities included groundwater extraction and treatment from six extraction wells. The extraction system provided hydraulic containment of the plume, thereby preventing potential offsite migration of the contaminant plume (RWQCB, 2000). The site was redeveloped in the mid-1990s with the existing industrial/office park. Based on the cross-gradient location of the site, and the localized contamination identified at the site, this facility is not considered an environmental concern to the subject property.
Able Auto Wrecking Yard/Pick-N-Pull Auto Dismantlers, 7400-7550 Mowry Avenue, is located approximately ¼ mile west of the subject property. The facility is listed on the WDS, SLIC, HAZNET and AST (as Newark Yard) databases. ACWD records indicate that an environmental investigation was performed at the facility in 1988 by Wahler Associates (Wahler, 1988). The investigation included collection of soil samples from 12 borings and installation of, and collection of groundwater samples from, three groundwater monitoring wells. Groundwater samples were analyzed for VOCs; semi-VOCs (SVOCs); petroleum hydrocarbons; benzene, toluene, ethylbenzene and xylenes (BTEX); cyanide; and lead. Soil samples, collected from depths ranging from approximately 1 to 5 feet bgs, were analyzed for the above listed compounds as well as pesticides, pH and PCBs.

The results of analysis of the soil samples indicated only the presence of total recoverable petroleum hydrocarbons (TRPH) at concentrations ranging from 4 to 520 milligrams per kilogram (mg/kg). In groundwater, only cyanide was detected in one well at a concentration of 96 micrograms per liter (ug/L). With the exception of one soil sample with a TRPH concentration of 520 mg/kg, the TRPH concentrations detected in soil were below the regulatory cleanup level of 100 mg/kg. Additionally, the cyanide concentration detected in groundwater was below the U.S. EPA Maximum Contaminant Level (MCL) for drinking water of 200 ug/L. Wahler recommended additional soil and groundwater sampling, but no evidence of further investigations was identified in regulatory agency records. Based on the cross-gradient location of the site, this facility is not considered an environmental concern to the subject property.

The remaining sites listed in the surrounding area in the databases are not expected to present significant environmental conditions to the subject property based on one or more of the following: (1) the listed site has received case closure by the appropriate regulatory agency; (2) the listed site is either cross gradient or down gradient of the subject property with respect to the inferred regional groundwater flow direction; (3) the listed site is a soils-only affected case; and (4) the listed site is located at too great a distance to represent a significant environmental condition with respect to the subject property.

4.0 SITE INSPECTION

An inspection of the subject property was conducted on July 28, 2006. The inspection was conducted by Julie Turnross, R.E.A. All areas of the site were inspected. Site photographs are presented on Plates 3 through 5.

The subject property is a vacant lot of approximately 115.1 acres. The site is located in a mixed undeveloped/agricultural and commercial area within the City of Newark and County of Alameda, California. The site is bounded to the northwest by an ACFC drainage channel and undeveloped land, to the northeast by railroad tracks, to the southeast by undeveloped land and to the southwest by Mowry Slough and undeveloped land. The site is located in a mixed
undeveloped/agricultural and commercial area within the City of Newark and County of Alameda, California.

The site consists primarily of low grass and weeds, although at the time of PES’ site inspection, the subject property was being disced. Wetlands are present on the west portion of the site adjacent to Mowry Slough. A dirt road runs parallel to the railroad tracks at the northeast property boundary.

Crushed piping and other items which may have been associated with a well and/or irrigation system components were observed laying along the east boundary of the property. Remnants of a telephone pole were also observed in the central portion of the property.

Eight empty 5-gallon metal pails and lids were observed adjacent to the railroad tracks near the northeast property boundary. The pails appeared to have formerly contained paint. No evidence of stained soil or distressed vegetation was observed in the vicinity of the pails. The pails appeared to be in the railroad right-of-way rather than on the subject property.

4.1 Chemical Use and Storage

No evidence of current or historical chemical use or storage was observed at the site or identified in regulatory agency records.

4.2 Underground and Aboveground Storage Tanks

No evidence of current or former USTs or ASTs was observed at the subject property or identified in regulatory agency records.

4.3 Back-Up Generators

No emergency generators were observed at the subject property.

4.4 Elevators

No elevators are present at the subject property.

4.5 Hydraulic Trash Compactors

No trash compactors were observed onsite.

4.6 Indications of Polychlorinated Biphenyls (PCBs)

No transformers were observed on the subject property.
### 4.7 Other Conditions

#### 4.7.1 Asbestos

Because there are no structures on the subject property, asbestos-containing materials are not considered an environmental concern at the subject property.

#### 4.7.2 Radon

The National Radon Database includes radon information from U.S. EPA/State Residential Radon Surveys conducted between 1986 and 1992. The database includes test results from 49 sites within Alameda County. The average value for radon level reported in this region was 0.776 pico curies per liter (pCi/l) of air for the first floor living area. This is lower than the U.S. EPA’s recommended action level of 4 pCi/l.

The survey indicates that it is unlikely that radon levels in buildings in Alameda County are above the EPA action level; no radon gas testing is deemed necessary for the subject property.

#### 4.7.3 Solid Waste

No solid wastes are currently generated at the subject property.

#### 4.7.4 Lead in Paint

The Consumer Products Safety Commission limited lead content in residential paint to 0.06 percent (600 parts per million) in 1978. The use of paint containing greater than 0.06 percent lead was also prohibited in areas where consumers have direct access to painted surfaces. Because there are no residential structures on the subject property, lead-based paint is not an environmental concern at the subject property.

### 5.0 FINDINGS

The subject property is a vacant lot of approximately 115.1 acres. The site is located in a mixed undeveloped/agricultural and commercial area within the City of Newark and County of Alameda, California. The site is bounded to the northwest by an ACFCND drainage channel and undeveloped land, to the northeast by railroad tracks, to the southeast by undeveloped land and to the southwest by Mowry Slough and undeveloped land. The site is located in a mixed undeveloped/agricultural and commercial area within the City of Newark and County of Alameda, California.

PES’s historical research indicates portions of the subject property have been used agriculturally from at least the 1940s. Crops reportedly grown on the site included hay, alfalfa
and row crops, however, no information concerning historical herbicide or pesticide use, if any, was available. No evidence of historical structures on the subject property was identified.

No evidence of current or historical hazardous material use was identified on the subject property or in regulatory agency records.

Based on a review of environmental regulatory databases and regulatory agency records, PES did not identify any potential sources of environmental concern to the subject property.

PES has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ATSM Practice E 1527 of the Rogers property near Stevenson Boulevard in Newark, California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment revealed no recognized environmental conditions (RECs) in connection with the property.

The following noteworthy observations were made that may present an environmental concern at the site:

- The site has been in agricultural use from at least the 1940s. No information is available concerning historical pesticide and/or herbicide use at the site.

6.0 DATA GAPS

No information was available concerning historical chemical use on the subject property. No other data gaps that may have affected our ability to identify RECs associated with the subject property were identified during the performance of this Phase I ESA.

7.0 ADDITIONAL SERVICES

PES recommends that the following additional services and investigations be performed:

- A Phase II investigation should be performed at the site to evaluate the potential affects of possible historical pesticide/herbicide use to onsite soils.

8.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and
performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

Resumes of the Environmental Professionals signing this report are presented in Appendix D.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2006 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.
A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA’s Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES
No mapped sites were found in EDR’s search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

FEDERAL RECORDS

NPL. National Priority List
Proposed NPL  Proposed National Priority List Sites
Delisted NPL  National Priority List Deletions
NPL RECOVERY  Federal Superfund Liens
CERCLIS  Comprehensive Environmental Response, Compensation, and Liability Information System
RCRA-TSDF  Resource Conservation and Recovery Act Information
RCRA-LQG  Resource Conservation and Recovery Act Information
ERNS  Emergency Response Notification System
HMIRS  Hazardous Materials Information Reporting System
US ENG CONTROLS  Engineering Controls Sites List
US INST CONTROL  Sites with Institutional Controls
FUDS  Formerly Used Defense Sites
US BROWNFIELDS  A Listing of Brownfields Sites
CONSENT  Superfund (CERCLA) Consent Decrees
ROD  Records Of Decision
UMTRA  Uranium Mill Tailings Sites
ODL  Open Dump Inventory
TRIS  Toxic Chemical Release Inventory System
TSCA  Toxic Substances Control Act
FTTS  FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
SSTS  Section 7 Tracking Systems
ICIS  Integrated Compliance Information System
PADS  PCB Activity Database System
MLTS  Material Licensing Tracking System
MINES  Mines Master Index File
FINDS  Facility Index System/Facility Registry System
RAATS  RCRA Administrative Action Tracking System

STATE AND LOCAL RECORDS
AWP  Annual Workplan Sites
Cal-Sites  Calsites Database
CA BOND EXP. PLAN  Bond Expenditure Plan
NFA  No Further Action Determination
NFE  Properties Needing Further Evaluation
REF  Unconfirmed Properties Referred to Another Agency
SCH  School Property Evaluation Program
Toxic Pits  Toxic Pits Cleanup Act Sites
CA WDS  Waste Discharge System
SWRCY  Recycler Database
CS  Contaminated Sites
HIST UST  Hazardous Substance Storage Container Database
CHMIRS  California Hazardous Material Incident Report System
Notify 65  Proposition 65 Records
DEED  Deed Restriction Listing
VCP  Voluntary Cleanup Program Properties
CLEANERS  Cleaner Facilities
WIP  Well Investigation Program Case List
CDL  Clandestine Drug Labs
HAZNET  Facility and Manifest Data
EMI  Emissions Inventory Data

Manufactured Gas Plants... EDR Proprietary Manufactured Gas Plants
EDR Historical Auto Stations... EDR Proprietary Historic Gas Stations
EDR Historical Cleaners... EDR Proprietary Historic Dry Cleaners

SURROUNDING SITES: SEARCH RESULTS
Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS
CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/01/2006 has revealed that there is 1 CERC-NFRAP site within approximately 1 mile of the target property.

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/15/2006 has revealed that there are 2 CORRACTS sites within approximately 1.5 miles of the target property.

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste, or over 1 kg of acutely hazardous waste per month. Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/09/2006 has revealed that there is 1 RCRA-SQG site within approximately 0.75 miles of the target property.

STATE AND LOCAL RECORDS

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 03/13/2006 has revealed that there are 2 SWF/LF sites within approximately 1 mile of the target property.

</tr>
</tbody>
</table>

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 1 mile of the target property.

CORTESSE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, and dated 04/01/2001 has revealed that there are 4 Cortese sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

**LUST:** The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 04/10/2006 has revealed that there is 1 LUST site within approximately 1 mile of the target property.

**CA FID:** The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.75 miles of the target property.

**CA SLIC:** SLIC Region comes from the California Regional Water Quality Control Board.

A review of the SLIC list, as provided by EDR, and dated 04/10/2006 has revealed that there are 9 SLIC sites within approximately 1 mile of the target property.
**UST:** The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 04/10/2006 has revealed that there is 1 UST site within approximately 0.75 miles of the target property.

**SWEEPS:** Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1980’s. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.75 miles of the target property.

ABLE AUTO WRECKERS (Continued)  

**Facility ID:** San Francisco Bay 01I012613  
**Facility Contact:** STROH, DAVE  
**SIC Code:** Not reported  
**Agency Name:** PICK-N-PULL AUTO DISMANTLERS  
**Agency Address:** 7590 Stockton Blvd  
Sacramento 95823 - 3970  
**Agency Contact:** STRON, DAVE  
**Design Flow:** Not reported  
**Facility Type:** Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
**Facility Status:** Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
**Agency Type:** ?  
**Waste Type:** Not reported  
**Threat to Water:** Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
**Complexity:** Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
**Reclamation:** Not reported  
**POTW:** Not reported  
**NPDES Number:** CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Other Pertinent Environmental Activity Identified at Site:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

### Site Information

**Site:** GOLDEN GATE AUTO AUCTION, INC  
**Address:** 6700 STEVENSON BLVD  
**City:** FREMONT, CA 94538  
**EDR ID Number:** 1000187005  
**Database(s):** RCRA-SQG, HAZNET, LUST

### Environmental Data

- **Relative:** Equal
- **Actual:** 7 ft.

### Owner Information
- **Owner:** VARIOUS PERSONS- CORP  
  **EPA ID:** CAD981166911
- **Contact:** ENVIRONMENTAL MANAGER  
  **EPA ID:** (415) 657-5660
- **Classification:** Small Quantity Generator

### Site Details
- **TSDF Activities:** Not reported
- **Violation Status:** No violations found

### State LUST Information
- **Cross Street:** Not reported
- **Reg Board:** San Francisco Bay Region
- **Chemical:** Gasoline
- **Case Type:** Other ground water affected

### Status
- **Status:** Case Closed

### Abate Method
- **Abate Method:** Excavate and Dispose - remove contaminated soil and dispose in approved site, Pump and Treat Ground Water - generally employed to remove dissolved contaminants

### Dates
- **Confirm Leak:** 1994-10-28 00:00:00  
  **Review Date:** 1994-10-28 00:00:00
- **Prelim Leak:** 1994-10-28 00:00:00  
  **Prelim Assess:** Not reported
- **Remed Plan:** Not reported

### Site Information
- **Enter Date:** 1995-06-06 00:00:00  
  **Funding:** Federal Funds
- **Staff Initials:** SDI
- **How Discovered:** OM
- **How Stopped:** Close Tank
- **Interim:** Yes

### Environmental Parameters
- **Leak Cause:** UNK
- **Leak Source:** UNK
- **MTBE Date:** Not reported
- **Max MTBE GW:** Not reported
- **MTBE Tested:** Site NOT Tested for MTBE. Includes Unknown and Not Analyzed.
- **Priority:** Not reported
- **Local Case #:** 0418
- **Beneficial:** Not reported

**Threat to Water Quality:**

Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.

**Facility Type:**

Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

**Complexity:**

Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.
Prime Waste: Process Waste (Waste produced as part of the industrial/manufacturing process) - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

2nd Waste Type: Solid Wastes - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

**FINDS:**

- **Other Pertinent Environmental Activity Identified at Site:**
  - California - Hazardous Waste Tracking System - Datamart
  - NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
  - The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).
  - RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
  - TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

Removal Action. This activity was originally counted as a
BORDEN INC ADHESIVES & CHEM DIV (Continued)

site certification. The 01/01/84 date was selected because it provided the earliest statute of limitations date. DTSC oversaw the removal of 6,100 gallons of contaminated liquids, 350 drums, and 8 cubic yards of contaminated soil.

Region 2 staff received Groundwater Technology/Characterization and Feasibility Study for this site. The submittal outlined proposed remedial work on groundwater solvent plumes required under a RWQCB order.

There are three major areas of soil and groundwater contamination: 1) a chlorinated organics plume near the center of the facility; 2) a methanol plume near the southern portion of the site; and 3) a diesel plume which overlaps the methanol plume. The plumes are not flowing off-site. A groundwater extraction and treatment system is being planned. Extraction by a network of shallow wells will be followed by a fixed-film bioreactor treating 60 lbs/day organics. Waste discharge requirements of 1 ppm of VOCs will be met. Ketones have been diminished but acetone and MEK are still present at 100 mg/l and PCBs at 12 mg/l.

Due to the presence of contamination, DTSC will delete this site from the list of Certified Sites and show the site as referred to the RWQCB.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Peterbilt Motors Site (Peterbilt/Site) operated a truck manufacturing facility from 1962 until October 1986. The Site's use prior to 1962 is unknown. The hazardous substances used and stored at the Site were: diesel fuel, gasoline, organic solvents, paints, and other organic chemicals. They were stored and/or treated in several areas of the facility: an underground storage tank (UST) area, an aboveground tank farm, four drum storage areas, a wastewater treatment plant including aboveground tanks, and a surface impoundment/waste evaporation pond area. Underground pipelines were used to transfer the hazardous substances between some of these areas. The manufacturing and waste management areas of the facility were closed by Peterbilt during the 1980s and early 1990s. The Site was used for office space, storage, warehousing, and as an engineering prototype test facility from 1986 to 1993. In 1994, property management and remediation responsibilities were transferred to Peterbilt’s parent company, PACCAR. PACCAR used the Site from 1993 to 1995 primarily for warehousing and shipping. The Site was sold to Georgia-Pacific Corporation (GP) on December 11, 1995. GP currently uses the Site as a rail-to-truck wood products distribution facility.

Site investigations were conducted at the Site between 1983 to 1995 and addressed six areas of potential concern: 1) the underground storage tank (UST) area, 2) the pipeline/utility conduit area, 3) the aboveground tankfarm/wastewater treatment plant area, 4) the hydraulic lift pit area, 5) the oil spill area, 6) the surface impoundment/waste evaporation ponds area. The six areas were individually remediated under the oversight of various state and local agencies, including Newark Fire Department, San Francisco Regional Water Quality Control Board, the Department of Health Services (DHS -precursor to the Department of Toxic Substances Control or DTSC), and the Alameda County Water District.

The SFRWQCB continues to act as lead agency and coordinates with the Alameda County Water District (ACWD) in overseeing groundwater is impacted with VOCs, BTEX, and TPH. The SFRWQCB adopted Order 97-114 (Order) on September 17, 1997 designating...
Background Info: a groundwater containment zone. Groundwater monitoring is
ongoing.

**FINDS:**

Other Pertinent Environmental Activity Identified at Site:

California - Hazardous Waste Tracking System - Datamart

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

EPA Waste Codes Addendum

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D001</td>
<td>IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.</td>
</tr>
<tr>
<td>D002</td>
<td>A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.</td>

</tbody>
</table>
To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**FEDERAL RECORDS**

**NPL:** National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

- **Date of Government Version:** 04/19/2006
- **Source:** EPA
- **Date Data Arrived at EDR:** 05/05/2006
- **Telephone:** N/A
- **Date Made Active in Reports:** 05/22/2006
- **Last EDR Contact:** 05/05/2006
- **Number of Days to Update:** 17
- **Next Scheduled EDR Contact:** 07/31/2006
- **Data Release Frequency:** Quarterly

**NPL Site Boundaries**

- **Number of Days to Update:** 17
- **Next Scheduled EDR Contact:** 07/31/2006
- **Data Release Frequency:** Quarterly

**DELISTED NPL:** National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

- **Date of Government Version:** 04/19/2006
- **Source:** EPA
- **Date Data Arrived at EDR:** 05/05/2006

- **Next Scheduled EDR Contact:** 07/31/2006
- **Data Release Frequency:** Quarterly

**NPL RECOVERY:** Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

- **Date of Government Version:** 10/15/1991
- **Source:** EPA
- **Date Data Arrived at EDR:** 02/02/1994
- **Telephone:** 202-564-4267
- **Date Made Active in Reports:** 03/30/1994

- **Number of Days to Update:** 56
- **Next Scheduled EDR Contact:** 08/21/2006
- **Data Release Frequency:** No Update Planned
**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

**CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**RCRA:** Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 04/14/2006
Date Made Active in Reports: 05/30/2006
Number of Days to Update: 46
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Last EDR Contact: 07/19/2006
Next Scheduled EDR Contact: 10/16/2006
Data Release Frequency: Annually

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/21/2006
Date Data Arrived at EDR: 03/27/2006
Date Made Active in Reports: 05/22/2006
Number of Days to Update: 56

Telephone: 703-603-8905
Last EDR Contact: 07/03/2006
Next Scheduled EDR Contact: 10/02/2006
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006

Next Scheduled EDR Contact: 10/02/2006
Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addressed by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments—EPA’s Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA’s Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients—States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

CONSENT: Superfund (CERCLA) Consent Decrees
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ODI: Open Dump Inventory
An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.
**TRIS:** Toxic Chemical Release Inventory System

Toxic Chemical Release Inventory System, TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

| Date of Government Version: 12/31/2003 | Source: EPA |
| Date Data Arrived at EDR: 07/13/2005 | Telephone: 202-566-0250 |
| Date Made Active in Reports: 08/17/2005 | Last EDR Contact: 06/22/2006 |
| Number of Days to Update: 35 | Next Scheduled EDR Contact: 09/18/2006 |
| Data Release Frequency: Annually |

**TSCA:** Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

| Date of Government Version: 12/31/2002 | Source: EPA |
| Date Data Arrived at EDR: 04/14/2006 | Telephone: 202-260-5521 |
| Date Made Active in Reports: 05/30/2006 | Last EDR Contact: 07/17/2006 |
| Number of Days to Update: 46 | Next Scheduled EDR Contact: 10/16/2006 |
| Data Release Frequency: Every 4 Years |

**FTTS:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

| Date of Government Version: 03/29/2006 | Source: EPA/Organization of Prevention, Pesticides and Toxic Substances |
| Date Data Arrived at EDR: 04/26/2006 | Telephone: 202-566-1667 |
| Date Made Active in Reports: 05/30/2006 | Last EDR Contact: 06/19/2006 |
| Number of Days to Update: 34 | Next Scheduled EDR Contact: 09/18/2006 |
| Data Release Frequency: Quarterly |

**FTTS INSPI:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

| Date of Government Version: 03/31/2006 | Source: EPA |
| Date Data Arrived at EDR: 04/26/2006 | Telephone: 202-566-1667 |
| Date Made Active in Reports: 05/30/2006 | Last EDR Contact: 06/19/2006 |
| Number of Days to Update: 34 | Next Scheduled EDR Contact: 09/18/2006 |
| Data Release Frequency: Quarterly |

**SSTS:** Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

| Date of Government Version: 12/31/2004 | Source: EPA |
| Date Data Arrived at EDR: 05/11/2006 | Telephone: 202-564-4203 |
| Date Made Active in Reports: 05/22/2006 | Last EDR Contact: 07/17/2006 |
| Number of Days to Update: 11 | Next Scheduled EDR Contact: 10/16/2006 |
| Data Release Frequency: Annually |

**ICIS:** Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

| Date of Government Version: 02/13/2006 | Source: Environmental Protection Agency |
| Date Data Arrived at EDR: 04/21/2006 | Telephone: 202-564-5088 |
| Date Made Active in Reports: 05/11/2006 | Last EDR Contact: 07/17/2006 |
| Number of Days to Update: 20 | Next Scheduled EDR Contact: 10/16/2006 |
| Data Release Frequency: Quarterly |
PADS: PCB Activity Database System
PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB’s who are required to notify the EPA of such activities.

- Date of Government Version: 12/27/2005
- Date Data Arrived at EDR: 02/08/2006
- Date Made Active in Reports: 02/27/2006
- Number of Days to Update: 19
- Source: EPA
- Telephone: 202-566-0500
- Last EDR Contact: 06/28/2006
- Next Scheduled EDR Contact: 08/07/2006
- Data Release Frequency: Annually

MLTS: Material Licensing Tracking System
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

- Date of Government Version: 04/12/2006
- Date Data Arrived at EDR: 04/26/2006
- Date Made Active in Reports: 05/30/2006
- Number of Days to Update: 34

- Last EDR Contact: 06/28/2006
- Next Scheduled EDR Contact: 09/25/2006
- Data Release Frequency: Semi-Annually

FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and ‘pointers’ to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

- Date of Government Version: 04/27/2006
- Date Data Arrived at EDR: 05/02/2006
- Date Made Active in Reports: 05/30/2006
- Number of Days to Update: 28
- Source: EPA
- Telephone: N/A
- Last EDR Contact: 04/03/2006

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administrative actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

- Date of Government Version: 04/17/1995
- Date Data Arrived at EDR: 07/03/1995

- Data Release Frequency: No Update Planned

BRS: Biennial Reporting System
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.
STATE AND LOCAL RECORDS

AWP: Annual Workplan Sites
Known Hazardous Waste Sites. California DTSC’s Annual Workplan (AWP), formerly BEP, identifies known hazardous
substance sites targeted for cleanup.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/29/2005
Date Made Active in Reports: 09/21/2005
Number of Days to Update: 23

Data Release Frequency: No Update Planned

NFA: No Further Action Determination
This category contains properties at which DTSC has made a clear determination that the property does not pose
a problem to the environment or to public health.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/29/2005
Date Made Active in Reports: 10/06/2005
Number of Days to Update: 38
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 05/10/2006
Next Scheduled EDR Contact: 08/28/2006
Data Release Frequency: Quarterly

NFE: Properties Needing Further Evaluation
This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated
properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is
currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but
not currently underway.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/29/2005
Date Made Active in Reports: 09/21/2005
Number of Days to Update: 23
Source: Department of Toxic Substances Control

Last EDR Contact: 05/10/2006
Next Scheduled EDR Contact: 08/28/2006
Data Release Frequency: Quarterly
REF: Unconfirmed Properties Referred to Another Agency

This category contains properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/29/2005
Date Made Active in Reports: 10/06/2005

Data Release Frequency: Quarterly

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 06/06/2006
Date Data Arrived at EDR: 06/07/2006
Date Made Active in Reports: 07/06/2006
Number of Days to Update: 29

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.
CorteSE: "Cortese" Hazardous Waste & Substances Sites List
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste
Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). This listing is no longer updated
by the state agency.

SWRCY: Recycler Database
A listing of recycling facilities in California.

LUST: Geotracker's Leaking Underground Fuel Tank Report
Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground
storage tank incidents. Not all states maintain these records, and the information stored varies by state.

LUST REG 4: Underground Storage Tank Leak List
Los Angeles, Ventura counties. For more current information, please refer to the State Water Resources Control
Board's LUST database.

LUST REG 6L: Leaking Underground Storage Tank Case Listing
For more current information, please refer to the State Water Resources Control Board's LUST database.

LUST REG 9: Leaking Underground Storage Tank Report
Orange, Riverside, San Diego counties. For more current information, please refer to the State Water Resources
Control Board's LUST database.
LUST REG 8: Leaking Underground Storage Tanks
California Regional Water Quality Control Board Santa Ana Region (8). For more current information, please refer to the State Water Resources Control Board’s LUST database.

Last EDR Contact: 07/17/2006
Next Scheduled EDR Contact: 10/16/2006
Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

VCP: Voluntary Cleanup Program Properties
Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

DRYCLEANERS: Cleaner Facilities
A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner’s agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

WIP: Well Investigation Program Case List
Well Investigation Program case in the San Gabriel and San Fernando Valley area.

CDL: Clandestine Drug Labs
A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.
HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

YOLO COUNTY:
OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

**Electric Power Transmission Line Data**
- Source: PennWell Corporation
- Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**AHA Hospitals:**
- Source: American Hospital Association, Inc.
- Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

**Medical Centers: Provider of Services Listing**
- Source: Centers for Medicare & Medicaid Services
- Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes**
- Source: National Institutes of Health
- Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools**
- Source: National Center for Education Statistics
- Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Private Schools**
- Source: National Center for Education Statistics
- Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

**Daycare Centers: Licensed Facilities**
- Source: Department of Social Services
- Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.
Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY
NWI Quad at Target Property: YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®
Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Map ID: 2

Soil Component Name: OMNI

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly. Soils may have a saturated zone, a layer of low hydraulic conductivity, or seepage. Depth to water table is less than 1 foot.

Hydric Status: Soil meets the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

Soil Map ID: 3

Soil Component Name: REYES

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.
Hydric Status: Soil meets the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: HIGH

| Depth to Bedrock Min: | > 0 inches |
| Depth to Bedrock Max: | > 0 inches |

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
APPENDIX D

RESUMES OF ENVIRONMENTAL PROFESSIONALS
JULIE TURNROSS
Senior Hydrogeologist

Ms. Turnross has over 25 years experience serving in technical and management capacities on a variety of projects in the areas of groundwater hydrogeology and geophysics. Her projects have included Phase I environmental site assessments, remedial investigations, feasibility studies, risk characterizations, and implementation of remedial alternatives at RCRA, CERCLA, and other facilities with soil, groundwater, surface water, and air contamination. Contaminants of concern have included organic solvents, petroleum hydrocarbons, metals, and explosives.

Ms. Turnross has provided litigation support and peer review for a wide variety of cases, and has served as an expert witness. She has also worked extensively with regulatory agencies throughout California and the west coast.

EDUCATION

University of California, Berkeley: M.S., Engineering Geoscience, 1984
University of Arizona, Tucson: B.S., Geoscience, 1982

EXPERIENCE

2005 – present PES Environmental, Inc., Novato, California
1995 - present JTEC Environmental, Sebastopol, California
1991 - 1995 Treadwell and Rollo, San Francisco, California
1984 - 1991 Harding Lawson Associates, Novato, California
1983 Laurence Berkeley Laboratory, Berkeley, California
1981 ARCO Exploration Company, Lafayette, Louisiana

REGISTRATION

California Registered Environmental Assessor No. 7862

REPRESENTATIVE PROJECTS

Naval Air Station: Performed review of remedial investigation, risk characterization, remedial alternative selection, remediation, and remediation verification for a Naval facility. Contaminants of concern included ordnance, solvents, metals, and petroleum hydrocarbons.
Litigation Support: Provided peer review of soil and groundwater investigation and 
remediation in support of lawsuit resulting from incomplete site cleanup. Analyzed 
investigation design and procedures, remedial alternative evaluation, cleanup methods, and 
confirmation testing.

Phase I Environmental Site Assessments: Performed or reviewed over 250 Phase I 
Environmental Site Assessments using ASTM standards. Clients have included lending 
institutions, real estate developers, insurance companies, law firms, and property owners. Properties assessed have included manufacturing facilities, office buildings, industrial sites, 
residential properties, and shopping centers.

Navy Shipyards: Provided technical review of Navy investigation and remedial activities and 
support for developer of former Navy shipyard. Site contaminants included metals, solvents, 
PCBs, and radiological material. Remediation included innovative technologies and 
implementation of land use controls.

Explosives Manufacturing Facility: Project manager for demolition of former explosives 
manufacturing facility, soil and groundwater investigation, and preparation of remedial 
investigation report. Project included development of facility use history, preparation of bid 
specifications, and coordination and documentation of demolition, and hazardous waste 
identification and disposal process.

Semiconductor Facility: Project manager for remedial investigation and feasibility study at 
CERCLA facility in Mountain View, California. Investigations included soil gas surveys, 
geophysical surveys, and soil, groundwater, and air sampling. Soil vapor extraction and 
groundwater extraction and treatment were used as interim remedial measures. Monitored 
effectiveness of 100-foot-deep, 3400-foot-perimeter slurry wall to be used to isolate 
contaminant source to allow dewatering and subsequent remediation by soil vapor extraction.

Chemical Facility: Project manager for remedial field investigation and corrective measures 
study for highly contaminated RCRA facility in Oregon. Contamination included presence of 
numerous free-phase and dissolved chemicals. Investigation included soil gas survey, soil 
borings, monitoring well installations, and air monitoring. Part of the investigation was 
conducted in Level B protection.

Geothermal Investigation: Performed integrated analysis of geophysical, hydrogeologic, and 
geologic data to develop conceptual model for geothermal basin. Designed geophysical field 
program using prototype equipment to evaluate geothermal reserve.

Water Supply Study: Provided water supply evaluation for proposed 300-family development 
with golf course and conference facility. Project included investigation of groundwater
resources and water quality, and aquifer testing.

**Oil Refinery:** Served as technical advisor for remedial investigation and cleanup at oil refinery in southern California. Tasks included aquifer testing, investigating potential of supplying water supply well, estimating effects of saltwater intrusion on contaminant movement, and designing groundwater extraction system.

**Groundwater Flow Modeling:** Used three-dimensional finite-difference groundwater flow model to optimize groundwater extraction well locations and to evaluate extraction system efficiency at electronics facility in Santa Clara, California. The site was comprised of multiple discontinuous aquifers with considerable variances in thickness and hydraulic conductivity.
Mr. Frizzell is a civil/environmental engineer with 28 years of experience, specializing in environmental assessments of properties, soil and groundwater investigations and remediation, and hazardous and solid waste management. He has been the project manager responsible for all phases of Remedial Investigations/Feasibility Studies and remedial action planning and design. He has evaluated hazardous waste disposal facilities throughout the U.S., focusing on facilities’ compliance with Federal and State regulations, and hydrogeological characteristics of the disposal sites. For real estate transfer projects, Mr. Frizzell has performed and/or managed more than 200 environmental assessments for developers, lenders, and attorneys. He has worked closely with developers on residential and commercial projects, which require environmental cleanup strategies and remediation of soils and/or groundwater. He also provides third party review of environmental projects for preparation of Environmental Impact Reports and litigation support. Mr. Frizzell has developed plans and specifications for hazardous waste site closures and has been involved in the design of gas, leachate, and surface water control systems. In addition, he has designed and prepared plans and specifications for slurry walls to control the migration of contaminated groundwater, and have been responsible for the selection and installation of synthetic liners for hazardous waste applications.

Mr. Frizzell’s project experience also includes dredging feasibility studies for open water and land disposal sites. These projects have included characterization of sediments in contaminated and uncontaminated environments, biological and water quality assessments, monitoring programs and maintenance of disposal areas.

Mr. Frizzell has also performed site investigations for foundation studies and has experience in design and construction of projects involving structural grouting, dam construction, and earthwork.

EDUCATION

B.S., Civil Engineering, University of California, Berkeley, 1978

SAFETY TRAINING

Health and safety training and update courses following EPA and OSHA requirements. Courses included training in physical, chemical, and toxicological properties of hazardous materials; hazard evaluation and control; selection and use of personal protective equipment; sampling and monitoring techniques and equipment; site entrance and decontamination procedures; and safety plan development.

EXPERIENCE

1989 - Present: PES Environmental, Inc., Novato, California

REGISTRATION

Civil Engineer - California, Arizona, Washington
Environmental Assessor - California, Washington

REPRESENTATIVE PROJECTS

Storm Water Management – Program manager for assisting various clients in compliance with the State of California Industrial Activities Storm Water General Permit. Activities included preparation of storm water pollution prevention plans, storm water monitoring plans and annual reports.

Litigation Support/Expert Witness Projects - Litigation support and expert witness services have included the areas of soil and groundwater remediation cost recovery actions; standard of care evaluations for environmental site assessments; assessment of damages due to releases from underground storage tanks; and claims due to a residential development over contaminated soils and groundwater. Client: Various Law Firms

Real Estate Assessment Projects - Program and project manager responsible for all phases of numerous real estate transfer assessment projects. Projects involve evaluating properties for potential liability due to hazardous waste contamination, site history evaluations, site inspections, regulatory review, and preparation of assessment reports. Program responsibilities include marketing, business development, training, and quality assurance/
quality control program development. Clients: Various Lending Institutions, Insurance Companies, Attorneys, Finance Companies and Developers

Dredging Feasibility Studies, Port of Oakland, California - Project manager responsible for dredged sediment disposal project involving site characterization and geochemical and surface water modeling to predict effluent water quality. Project involved conducting a feasibility study to dispose highly saline and contaminated sediments in an upland environment and development of control measures. Client: Port of Oakland

Richmond Marsh Restoration, Richmond, California - Large amounts of paint residue were uncovered during construction of new channels to restore marshland on edge of San Francisco Bay. As project manager: developed and implemented site-characterization plans; developed, tested, and analyzed potential remedial actions; selected preferred remedial action; prepared draft and final Remedial Action Plans; attended public hearings; developed community Relations Plan; and developed construction plans and specifications and post-construction monitoring plans. Managed all negotiations with state regulatory agencies. Client: City of Richmond

Hazardous-Waste Investigation, State Superfund Site, Richmond, California - Project manager for investigation at former pesticide formulating and packaging site. Responsible for all phases of investigation, including hydrogeological studies, analytical testing program, contaminant transport evaluations, study of offshore contaminant migration in marine sediments, evaluation of bioavailability of contaminants to marine organisms, and dredging of contaminated sediments. Planned and implemented remedial actions involving construction of temporary waste piles, installing synthetic membranes, and removing and transporting contaminated soils and debris. Project has included close coordination and involvement with various state regulatory agencies. Client: Levin Richmond Terminal Corporation

PCB Spill Investigation and Cleanup, Northern California State Superfund Site - Engineer for study to determine extent of contamination from PCB spill. Organized hydrogeologic study to determine contaminant migration potential, examined cleanup options, and prepared economic analysis of alternatives. Client: MGM Brakes

Landfill Closure Plans and Specifications, Alameda, California - Project manager responsible for preparing plans and specifications for closing 43-acre sanitary landfill adjacent to San Francisco Bay. Project included construction of surface impoundments for placing dredge spoils for use as cover material and preparation of earthwork plans and specifications for cover system. Project also included designing and installing post-closure groundwater monitoring system and performing leachate characterization study and contingency plan. Client: City of Alameda

Soil Process and Treatment Program, Richmond, California - Project manager for site remediation involving processing and treatment of 35,000 cubic yards of lead-contaminated
soil. Processing involved physical separation through screening; treatment involved proprietary fixation process. Responsible for regulatory negotiations, contractor selection, and quality control program. Client: City of Richmond

Site Remediation Program, Pittsburg, California - Project engineer responsible for plans and specifications to remediate 4-acre asbestos-contaminated site. Project involved examination and evaluation of cover options, selection of contractors, regulatory negotiations, and construction observation. Client: John Mansville

Slurry-Wall Design, Martinez, California - Project engineer responsible for designing 3300-foot-long slurry wall through existing surface impoundments containing effluent from oil refinery. Responsible for setting up and evaluating effluent/bentonite slurry permeability testing program for development of design criteria. Duties also included preparing plans and specifications, evaluating contractors’ bids, and reviewing construction-control program for slurry-wall installation. Client: Shell Oil

Surveys of Hazardous-Waste Treatment, Storage, and Disposal Sites, Nationwide - Project manager responsible for conducting surveys and preparing evaluation reports for over 50 commercial hazardous-waste facilities. Evaluations focus on hydrogeologic, managerial, environmental, regulatory, financial, and safety aspects of disposal-site operations. Projects have been performed in response to generator concern for "cradle to grave" responsibility for hazardous waste. Clients: Shell Oil Company, Chevron U.S.A. Inc., and IBM Corporation

Landfill Assessment and Geotechnical Studies, Albany and Berkeley, California - Project manager for investigating and evaluating inactive sanitary landfills in regard to generation and migration of leachate and methane, providing recommendations for developing landfills to support various structures, assessing potential impact of landfill on future development, and preparing preliminary closure plans. Project has also included preliminary geotechnical studies for landfills involving geohazards evaluation, general foundation recommendations, and slope-stability studies. Client: Hall, Goodhue, Haisley and Barker, for Santa Fe Land Improvement Company

Closure Plan Development, Tucson, Arizona - Project engineer for closure plan for 18 sludge-drying beds from wastewater treatment plant. Project included developing analytical testing program, decontamination procedures, and plans for closing system. Client: Hughes Aircraft Company

Hazardous-Waste Investigation, State Superfund Site, Richmond, California - Project manager for site investigation and remedial-action planning at site contaminated with heavy metals from uncontrolled releases from waste piles and buried drums. Duties included setting up field investigations and analytical programs for site characterization and planning remedial actions. Client: Summer del Caribe

RCRA Part B Permit Application Review, Hazardous-Waste Facility - Responsible for reviewing Part B permit applications for various treatment, storage, and disposal facilities.
Reviews focus on operators’ compliance with federal regulations. Client: A. T. Kearney, for U.S. Environmental Protection Agency

Hydrogeological and Geotechnical Investigation of Dioxin Contamination, Times Beach, Missouri - Served as alternate field operations manager. Conducted drilling and sampling and implemented decontamination and chain-of-custody procedures. Client: CH2M Hill, for U.S. EPA

Environmental Risk Assessment, Santa Rosa, California - Developed risk assessment report focusing on environmental risks associated with City of Santa Rosa operations, including sewer treatment plants, sludge disposal, and hazardous-material storage. Client: Environmental Risk Assessors, U.S.A.

Hazardous Waste Investigation, Sacramento, California - Engineer and assistant project manager for site investigation to characterize unknown wastes and to determine lateral and vertical extent of contamination due to unmanaged-disposal practices. Client: Aerojet

Hazardous Waste Investigation, Santa Rosa, California - Engineer for site investigation to determine existence and direction of migration of organic solvents from point sources of pollution. Organized analytical testing program to determine amounts and extent of groundwater pollution. Client: Hewlett-Packard

Landfill Closure, Alameda, California - Project engineer responsible for preparing all phases of plans and specifications for combination sanitary landfill closure and dredge spoils pond construction on 110-acre site. Project involved design of landfill closure system, slurry wall for leachate control, passive methane gas venting system, dike construction, seawall repair, decant structure, and hydraulic control systems. Client: U.S. Navy

Hazardous Waste Investigation, Martinez, California - Field engineer during investigation to determine extent of contamination due to leaching from disposal pond containing tetra ethyl lead. Supervised drilling activities and safety procedures for initial phase of cleanup study. Client: E.I. DuPont Nemours

Gasoline Spill Investigation, Novato, California - Project engineer during investigation conducted to determine extent of groundwater and soil contamination resulting from leaking underground gasoline storage ranks. Project involved using soil-gas and groundwater monitoring techniques. Client: Texaco Incorporated

Gasoline Spill Investigation, Stockton, California - Conducted post-remedial-action investigation to assess potential for future migration of gasoline from service station with residual soil contamination. Client: Exxon Company U.S.A.

Tailings Dam, Green River, Wyoming - Resident engineer during construction of tailings dam for solid-waste management program. Responsible for quality control, redesigned plans to accommodate field conditions, and prepared final earthwork report. Client: Allied Chemical
Hillside Development, Walnut Creek, California - Resident engineer in charge of construction for many phases of earthwork. Supervised mass grading operations including landslide repair, installation of subsurface drainage, and rebuilding of cut slopes. Installed and monitored hydraulics and piezometers for groundwater control. Client: Terra California

Gravel Island, Beaufort Sea, Alaska - Design verification agent during construction of island for drilling platform. Reviewed design criteria and observed construction in arctic environment. Client: Exxon Company, U.S.A.

Foundation Construction, Oakland, California - Field engineer during construction of drilled-pier foundations. Client: Peralta Hospital

Structural Grouting, Port Clinton, Ohio - Field engineer for stabilization of power plant foundation. Designed grout mixes according to varying subsurface conditions, supervised grouting batch plant operation, and installed extensometers to measure rock displacement during construction. Client: Toledo Edison Company

Earthquake Engineering, San Francisco, California - Developed seismic-response spectra for several sites in California using various computer programs and data-retrieval systems. Client: Nuclear Regulatory Commission
