D. WRITTEN COMMUNICATIONS

D.1 Design Review of four new advanced manufacturing buildings at 7380 Morton Avenue, location of the former Morton Salt Plant.

RESOLUTION NO. 10778
Assistant City Manager Grindall stated that Newark Industrial Partners proposes four new advanced manufacturing buildings located at 7380 Morton Avenue. The 29.89-acre project site will be reconfigured into four lots as follows:

Building 1 will be 161,680 square feet on a 7.71-acre lot with 183 parking spaces. Building 2 will be 141,275 square feet on a 6.18-acre lot with 159 parking spaces. Building 3 will be 76,162 square feet on a 4.85-acre lot with 138 parking spaces. Building 4 will be 225,679 square feet on a 11.15-acre lot with 254 parking spaces.

Assistant City Manager Grindall stated that this project is only subject to design review and is considered ministerial. The project is allowed by right in the zoning district and is exempt from the California Environmental Quality Act (CEQA). This project will create up to 500 jobs and generate impact fees of over $2 million.

Assistant City Manager Grindall stated that City received two letters from law firms (Holland & Knight, Adams Broadwell Joseph & Cardozo) this afternoon claiming the project was discretionary and requested CEQA review. He stated that staff has reviewed the letters and concluded that there is no merit to their assertion.

Timur Tecimer, project applicant, presented a marketing video of the proposed project. He stated that he cannot disclose the names of the companies that are interested in the site at this time. He stated that he agreed with the staff report and the resolution.

Paula Kirlin, Holland & Knight CEQA and land use counsel for the applicant, stated that she reviewed the letters that were submitted today. She supported the City position that this is a ministerial review and this was not a Cortese List site.

Collin McCarthy, Adams Broadwell Joseph & Cardozo, stated that he represented Newark Residents for Responsible Development. He said that this project is a discretionary approval subject to the requirements of CEQA. He requested that the City Council not approve the project and follow the CEQA process.

David Lanferman, Rutan & Tucker, LLP, outside legal counsel for the City stated that he reviewed this matter for the City and found the staff report to be accurate in claiming the statutory exemption to CEQA.

Jonathan Weissglass, Lozeau Drury, LLP, stated that he represented the Laborers Internation Union and referenced the letter they submitted this afternoon. He outlined the reasons that they believed made this a project subject to CEQA.

City Attorney Benoun reiterated the City’s position that this project was not subject to CEQA.

Vice Mayor Hannon moved, Council Member Collazo seconded to, by resolution, approved DR-18-4, a Design Review for four new advanced manufacturing buildings.

F.2 Authorizing the City Manager to sign an agreement with VIEVU, LLC for Police Department Body Camera replacement and cloud storage – from Police Chief Carroll. (RESOLUTION)

Background – In 2013, the City Council approved the purchase of body-worn camera (BWC) devices and a standalone storage solution from VIEVU, LLC (“VIEVU”). The goal of the purchase was to provide a tool for institutional transparency, encouraging professional conduct, and offering additional evidence both in completing a crime report and in investigating complaints of police misconduct. Body-Worn cameras are for the benefit of all parties; supporting accusations of poor performance, unlawful behavior, misconduct while also protecting officers from false allegations. The use of video technology is becoming increasingly important to police work and communities who both seek better accountability and transparency.

A standalone storage solution was implemented in 2013 as Cloud storage was a relatively new concept, was very expensive, and not widely tested for the needed data security requirements of law enforcement.

Police Department staff recommends upgrading the current inventory of body-worn cameras to those with more efficient distribution capabilities. The improved body-worn cameras will provide a Cloud storage solution, configurable field-of-view, auto-activation and up to 3 minutes of “pre-event recording.”

Cloud storage for the large data files created by body-worn cameras has now been through rigorous security testing and has become more affordable as part of an overall body-worn camera program component. VIEVU offers Cloud storage through the federally compliant Microsoft AZURE software solution that meets the Police Department’s needs.

The configurable field-of-view refers to the adjustable angle field of view during recording. The Police Department can choose a 70, 95 or 120-degree angle view depending on the tactical situation. VIEVU advised the preferred view is 95 degrees as it provides the best depth and overall picture quality. VIEVU allows the camera to zoom out to 120 degrees during a large event such as a parade. This will help when identifying issues in a large crowd. The disadvantage to the 120-degree setting is the loss of picture clarity. VIEVU advised the 70-degree setting allows for a narrower field of view for an event that requires close contact. The 70-degree setting can at times be too small and limited in what the camera captures. The 70-degree setting should only be used if there was a specific identify need. The view angle is configurable by City of Newark Information Technology staff only and must be selected prior to the camera being deployed by the officer.

Pre-event recording refers to the camera’s ability to record video only in a loop for up to 3-minutes which allows for capturing actions before user activation of full recording capabilities. The pre-event record is video only, no audio is captured. After speaking with our IT unit, VIEVU, and the officers who tested the cameras, found a 30-second pre-event record was optimal for capturing needed data, while still protecting privacy rights of officers and the public.
The L5 (BWC) is currently testing several different Auto-On options, such as when an officer activates emergency lights and siren, or when a rifle is unlocked from the rifle rack. The camera can be set to Auto-On when a patrol vehicle reaches a designated speed set by the agency. It is anticipated that this technology will be available and implemented by 2019.

VIEVU, LLC is currently working with Sunridge Systems (RIMS), the Police Department's current Computer Aided Dispatching and Records Management System to allow data captured on the L5 (BWC) to be downloaded and then migrated over and populated into the property section of RIMS. This will help save time when completing reports as well as remind officers that they have evidence that needs to be documented and accounted for.

A replacement of all body-worn cameras will provide the Police Department with the ability to provide all personnel with an individual camera. There will be a surplus of cameras to maintain operational capability when units need service, repair, or for events that require officers not typically assigned to field operations. The cameras have an average life-cycle of 36 to 48 months and will be cycled out and replaced at 30 months and again upon renewal of the contract at 60 months without charge, per the terms of the proposed Agreement. This will allow officers to have the most current (BWC) technology available.

In addition to the purchase of new cameras, staff recommends obtaining VIEVU’s Solution Services to provide camera data management tools and offsite Cloud storage from its web-based application. This service will enable the Police Department to streamline responses for body-worn camera file requests by eliminating the need to reproduce DVD copies of files; rather, the application can generate secure share sites and links directly to recipients, such as the District Attorney. The software has a robust tracking and auditing feature controlled by the Police Department on a user-specific basis to prevent any fraudulent or unauthorized access to this investigative data.

It is because of all of these innovations that staff found the Vievu L5 (BWC) the best camera for the Police Department and recommends entering into a five-year “VIEVU Solution Premium Services Agreement” with VIEVU, LLC. The agreement includes 65 LE5 model cameras and ancillary equipment, maintenance, support, a refresh of equipment at 30 months, accompanying web-based software application provided on a “Software as a Service” basis, with 32.5 Terabytes (TB) of shared cloud-based storage space.

While other vendors have somewhat similar functionality, the software, storage, accessibility, and functionality remain the determining factors in selecting the vendor that best meets the needs of police department’s body-worn camera program. There is also a significant challenge to consider on changing the current device and manufacturer - which is how to maintain and access the critical data files already created.
COMPETITIVE BIDDING PROCESS AND EVALUATION
The Santa Cruz County Sheriff's Department conducted a Request for Proposal (RFP) for new body-worn cameras in 2016. Upon completion of the formal selection process, the County of Santa Cruz entered into a contract with Vievu, LLC to purchase 154 Body Worn Cameras.

The competitive open bid process used by the Santa Cruz County Sheriff's Department was reviewed by the Police Department and found that it satisfies the City of Newark's requirements for its proposed Body Camera replacement. Further review by the City Purchasing Officer resulted in the authorization for the City to participate in an intergovernmental procurement for the purchase and installation of the Vievu Body Worn Camera system and Cloud Storage with its federally compliant Microsoft AZURE software. By using the inter-governmental procurement process, the City is assured of the competitive set prices established by the Santa Cruz County Sheriff's Department formal selection process.

During the evaluation process, Police Department Staff received a competitive bid from Vievu which was lower than the Santa Cruz Sheriff's Department formal bid.

Body-worn cameras are customized with meta-data making them individual to each officer to afford the highest possible efficiency while deployed. VIEVU model LE5 body-worn camera has a record time of 12 plus hours and provides adjustable fields of view of 70, 95, and 120-degree angles for different tactical situations. We found the VIEVU LS (BWC) the best camera for our agency.

The purchase of 65 VIEVU LE5 body-worn cameras, ancillary equipment such as charging docks, and software subscription will be $40.00 per month per camera or $34,242.00 annually. The total charge for the five-year contract, including $15,210.00 for sales tax, is $171,210.00 The police department will use existing budgeted equipment replacement funds to cover the cost of the new body-worn cameras. Execution of this agreement will stabilize the costs of the body-worn camera program and allow for regular equipment updates without requiring one-time costs every few years. Additional savings will be achieved in reducing the amount of staff time currently dedicated to this program from Information Technology and the Evidence Section of the Police Department.

Attachment

Action - It is recommended that the City Council, by resolution, authorize the City Manager to sign a five-year agreement between the City of Newark and VIEVU, LLC for equipment and services to upgrade and supply the Newark Police Department with body-worn cameras.
RESOLUTION OF THE NEWARK CITY COUNCIL
AUTHORIZING THE CITY MANAGER TO SIGN A FIVE-YEAR AGREEMENT BETWEEN THE CITY OF NEWARK AND VIEVU, LLC FOR EQUIPMENT AND SERVICES TO UPGRADE AND SUPPLY THE NEWARK POLICE DEPARTMENT WITH BODY-WORN CAMERAS

WHEREAS, on December 23, 2013, the City of Newark purchased 55 body-worn camera devices and a standalone storage solution from VIEVU, LLC, ("VIEVU") for $38,495.00, for use by the Newark Police Department; and

WHEREAS, the standalone storage system no longer meets the needs of the Police Department due to significant software deficiencies that are inconsistent with modern industry standards.

WHEREAS, VIEVU now offers a “VIEVU Solution Premium Services Agreement”, which includes the procurement of 65 LE5 model cameras and ancillary equipment, maintenance, support, a refresh of equipment at 30 months, and accompanying web-based software application provided on a “Software as a Service” basis, with 32.5 terabytes (TB) of cloud-based storage space. VIEVU’s cloud storage is provided through the federally compliant Microsoft AZURE software solution, and meets the Police Department’s needs and provides capacity for increased storage needs in the future; and

WHEREAS, following extensive research and evaluation of new technology, VIEVU was identified as the preferred vendor to offer a complete and integrated solution that meets the Police Department’s needs. VIEVU addresses the shortcomings of the Police Department’s current system and provides compatible enhanced software and hardware improvements, in that:

- Body-worn cameras will be customized with meta-data making them individual to each officer to afford the highest possible efficiency while deployed.

- It is critical to maintain a consistent body-worn camera specification to ensure all officers have the same type and level of recording capability, specifically with regard to pre-event recording.

- The VIEVU model LE5 body-worn camera has a battery life of 12 plus hours and provides adjustable fields of view of 70, 95, and 120-degree angles for different tactical situations.

Direction to file Annual Reports and intention to order improvements for Landscaping and Lighting District Nos. 1, 2, 4, 6, 7, 10, 11, 13, 15, 16, 17, 18, and 19 and setting June 28, 2018 for the public hearing – from Public Works Director Fajeau. (RESOLUTIONS-2)

Background/Discussion – The City Council has previously created Landscaping and Lighting District Nos. 1, 2, 4, 6, 7, 10, 11, 13, 15, 16, 17, 18, and 19 to provide for the operation and maintenance of certain landscaping and lighting improvements. These districts are as follows:

Landscaping and Lighting District No. 1: Central Avenue between Filbert Street and Willow Street - Provides for the maintenance of median landscaping on Central Avenue between Filbert Street and Willow Street and buffer landscaping adjacent to the Alameda County Flood Control channel immediately west of Filbert Street, and for the maintenance and operation of median street lights along this portion of Central Avenue.

In the opinion of bond counsel, Brown Act amendments requiring two hearings for increasing assessments do not apply to the annual budget hearings unless there is an addition to the improvements or a change in the formula for allocating the cost among benefited properties. Neither of these cases applies for each of the above districts and the annual public hearings are simply to adopt a budget for the upcoming year.

Upon conclusion of the annual public hearings, the assessments for the cost of the work are added to the tax bills for those property owners included within the boundaries of the particular Landscaping and Lighting District. Excess funds, or funds collected for which no work was done, can be carried over from one year to the next.
Action - It is recommended that the City Council, by resolutions, direct the filing of annual reports for Landscaping and Lighting District Nos. 1, 2, 4, 6, 7, 10, 11, 13, 15, 16, 17, 18, and 19 in accordance with the provisions in the Landscaping and Lighting Act of 1972 and confirm the intent to order the improvements by setting the date for the annual public hearings for these districts for June 28, 2018.
